

QuickStart Service for Cortex XDR Pro per GB

Quickly Deploy Your Cortex Data Lake and Five Device Feeds

To quickly increase your capabilities, our consultants will help you plan and execute your Cortex XDR® deployment. This includes configuration of Cortex® Data Lake, plus integration with Panorama™ network security management and/or data feeds from up to five devices. Knowledge transfer to your team is included, as is documentation upon completion of the engagement. The results will be an up-and-running Cortex XDR framework and associated operations to automate detection and accelerate investigations.

Benefits

- Fast-tracked implementation with Cortex Data Lake configuration and data feed integration.
- Consolidated visibility of alerts from Next-Generation Firewalls and third-party devices.
- Reduced deployment risks with assistance from our experts, utilizing best practices.
- Effective operations, administration, and management with knowledge transfer to your team.

How It Works

Planning and Discovery

Palo Alto Networks conducts, with your participation, conduct planning activities and a review of the project requirements (new deployment), and establishes key milestones, timelines, and follow-up action items.

Palo Alto Networks provides a predefined Project Plan and performs one (1) review with your team for the addition of your specific requirements and feedback.

Palo Alto Networks provides a Cortex XDR Solution Design Document, and performs one (1) review with your team for the addition of customer-specific requirements.

Onboarding

Our expert consultant will work with you to create a Cortex XDR Solution Design Document to address your business needs. This includes designating which five devices will be set up to feed data into Cortex Data Lake. The consultant captures your environment's requirements and current settings, including:

- Configure Cortex Data Lake.
- Configure Cortex apps.
- Access to Cortex XDR verified.
- Firewall requirements.
- Security information and event management (SIEM) integration, if applicable.
- Deploy Cloud Identity Engine (CIE).
- Deploy Broker VM.
- Provide assistance integrating NGFWs or third-party log sources.

Configuration and Review

Using the Cortex XDR Solution Design Document, the consultant configures your Cortex XDR framework as well as integrates data feeds from five devices to populate Cortex XDR and Cortex Data Lake.

Deployment and Optimization

The consultant deploys Cortex Data Lake with proper integration with Panorama. The consultant also confirms alert visibility from Next-Generation Firewall devices and integrates third-party log sources.

Documentation and Knowledge Transfer

The Solution Design Document gets updated during the engagement. Upon completion, the consultant reviews your deployment with your team and delivers as-built documentation.

To order the QuickStart Service for Cortex XDR Pro per GB, please contact your local Palo Alto Networks partner or sales representative.
